# MONA Lisa®

## A Work for ART

- English -

# Mona Lisa®

## Aspiration Needle

### Lancet shape

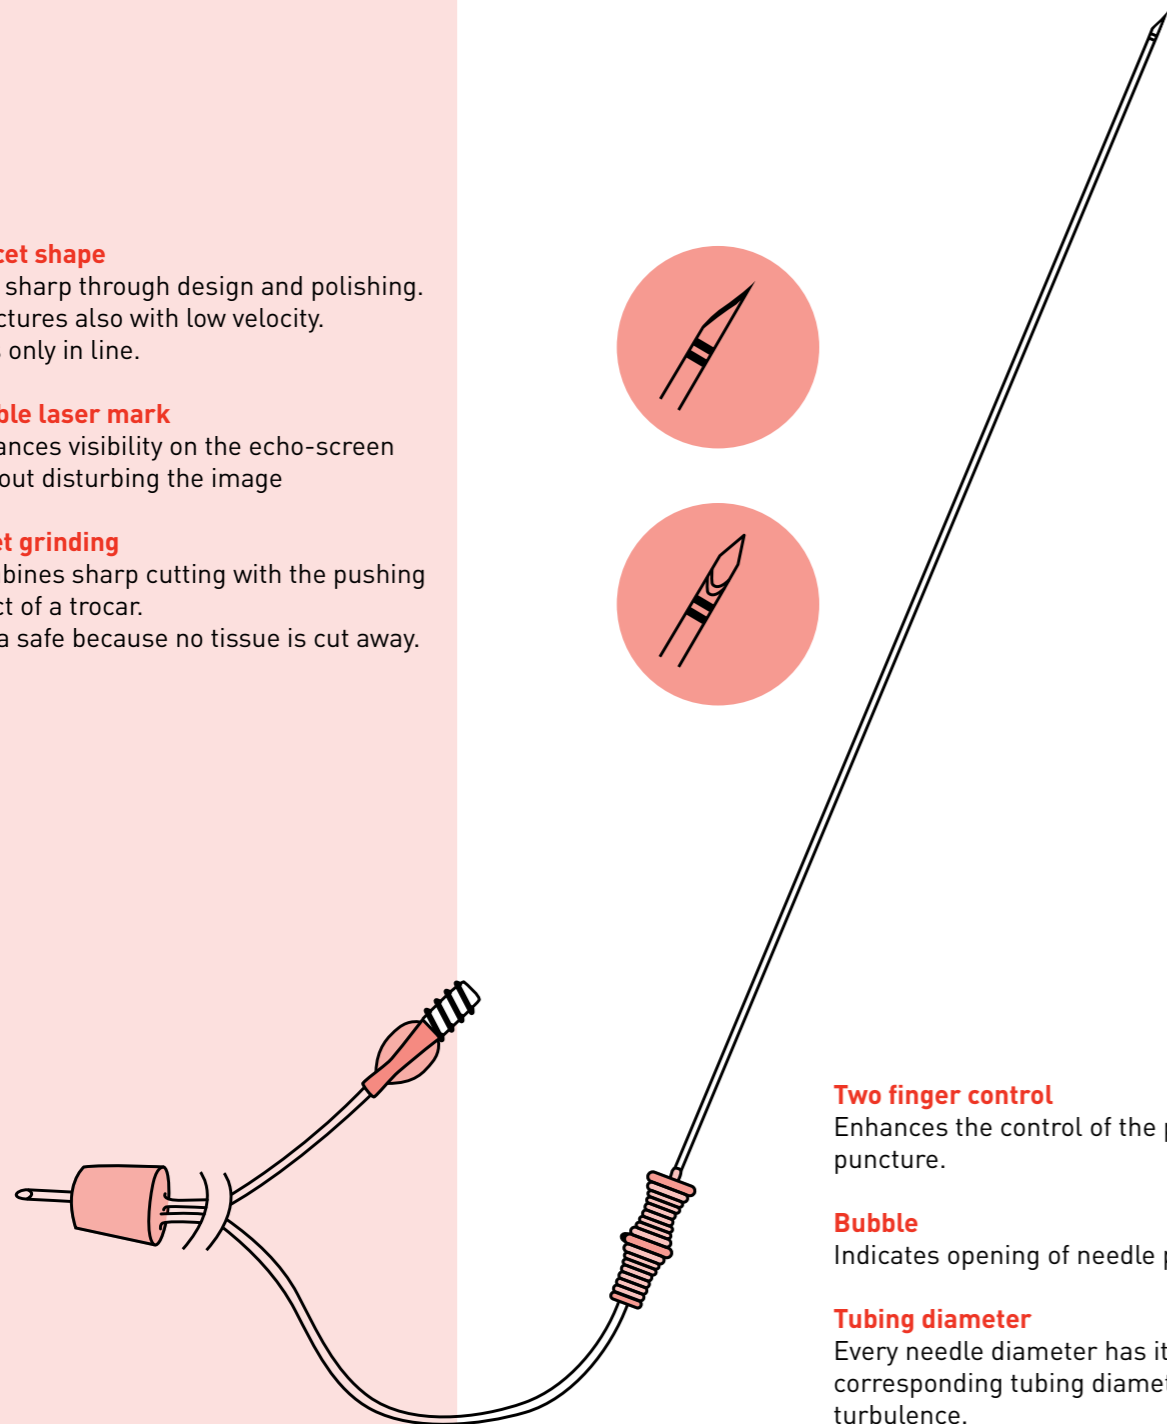

Very sharp through design and polishing. Punctures also with low velocity. Cuts only in line.

### Double laser mark

Enhances visibility on the echo-screen without disturbing the image

### Facet grinding

Combines sharp cutting with the pushing effect of a trocar. Extra safe because no tissue is cut away.

### Two finger control

Enhances the control of the precision puncture.

### Bubble

Indicates opening of needle point.

### Tubing diameter

Every needle diameter has its own corresponding tubing diameter to avoid turbulence.

# Mona Lisa® Aspiration Needle specifications

Product code	G-MN-1,6-A	G-MN-1,6-Short-A	G-MN-1,4-A	G-MN-1,4-Short-A	G-MN-1,4-SP-A	G-MN-1,4-SP-Short-A
